

ISU Communication 1504

Please refer to the following excerpt from the above noted Communication:

IV. Clarification of evaluating the Flip and Lutz jumps

1. The Technical Panel will use the sign “ e ” (edge) for severe cases of wrong take-off edge (long wrong edge, no correct edge at all etc.); in these cases GOE of the Judges must be reduced by –1 to –3 and must be negative.

2. The Technical Panel will use the sign “ ! ” (attention) in cases when a wrong take-off edge is short or not so obvious; in these cases the decision on the GOE is at the discretion of every Judge.

Currently the latest release of CSS (version 8.01) does not contain the ability to process the second of the two messages to be transmitted from the Technical Panel to the Judges touch screens. Until the software is updated to transmit both messages, the following process will be followed:

- If the Technical Panel determines that the criteria for assigning the above noted “e” (edge) message with respect to a particular flip or lutz has been met, the process for sending the incorrect edge message to the judges from last year shall apply. The judges are then instructed to apply the GOE reduction as per point one (1) above.
- If the Technical Panel determines that the criteria for assigning the above noted “!” (attention) message with respect to a particular flip or lutz has been met, the Technical Controller will inform the Referee, who will then inform the Judges to assign a GOE to that element as per point two (2) above.
